

STARR-LAM™ GLULAM SCAFFOLD PLANK

HANDLING RECOMMENDATIONS

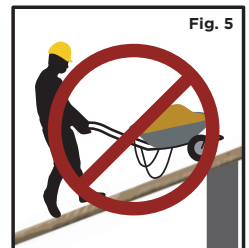

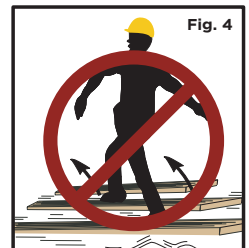

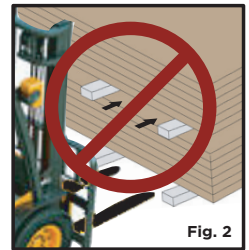

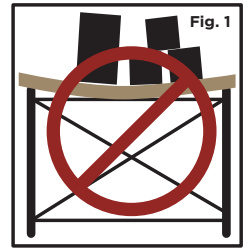

Proper handling will help protect your planks from damage that may reduce their useful life. To help ensure optimal performance and the longevity of your planks, please carefully read the following. Immediately remove from service planks that show damage and wear as this may lead to injury or death.

STARR-LAM™ scaffold planks are intended to be used exclusively as scaffold planks. Other use may cause damage that will make the planks unsafe for their intended use.

PROPER HANDLING TO PREVENT PLANK DAMAGE

- DO NOT exceed allowable spans (see span chart). (Fig. 1)
- DO NOT exceed maximum allowable deflection (see span chart). (Fig. 1)
- DO NOT push bundles with forklift forks or other heavy equipment. (Fig. 2)
- DO NOT drop or throw planks from scaffold. A thrown plank should be inspected and evaluated before reuse. (Fig. 3)
- DO NOT jump or bounce on planks. (Fig. 4)
- DO NOT expose scaffold planks to oxidizing chemicals.
- DO NOT use planks for formwork, mudsills, wheelbarrow ramps or anything other than scaffold planks. (Fig. 5)
- DO NOT cut, drill or notch planks,
- DO NOT use damaged planks (cut, drilled, notched, split, dented, gouged, cracked, rotten, burnt, etc),

BEFORE USE : Always inspect your scaffold planks

The above guidelines are not all-inclusive, nor considered to replace other safety and precautionary measures. They are not intended to supersede the requirements or regulations as spelled out by the Occupational Safety and Health Administration (OSHA), nor the standards outlined by the American National Standards Institute (ANSI).
